Subject Index Volume 280

Acitretin 388
Acne 97, 152
Adenylate cyclase 163
Adherence 194
Adherence reactions 235
Alkanes 375
Allergic contact dermatitis 5, 354
Alopecia areata S47, S85, 179
Alpha$_1$-antitrypsin 198
Alpha$_1$-proteinase inhibitor 198
Androgen receptor 487
Angiogenesis 395
Anthralin 443
Antianaphylactic agents 158
Anti-BMZ antibody 411
Anti-LA antibodies 127
Antinuclear antibodies 399
Anti-RO antibodies 127
Arachidonic acid 103, 392, 474
– – metabolism 437
Arotinoid 246
Arotinoids 152
Autocrine growth 71

B-16 Melanoma cells 481
Basal cell carcinoma 228
Basement membrane 338
Benzo-a-pyrene 443
Benzoic acid 420
Benzoyl peroxide S90
Beta-adrenergic adenylate cyclase 89
– -propiolactone 443
Blister fluid 93
Blood 124
– filtration technique 390
Bullous dermatoses S66
– diseases 333
– pemphigoid 411
– pemphigoid antigen 416
Butchers' warts S24

C3 receptor 39
Calcium 137
Calmodulin 323, 497
Calpain 380
CaM-Antagonism 323
Candida albicans 168
Carcinogenesis 300
Carrier detection 457
Cell culture 140
Cellular and humoral immunity of butchers S24
Chemoattractants 185
Chemotactic response 185
Chemotaxis 354, 477
Cholesterol 108
Chromosomal fragility S19
Chronic liver diseases S55
Cigarette paper method 54
Circulating antibodies 45
– immune complexes 325
Cocarcinogen 443
Collagen 50, 338
– autoantibodies 333
– fibrils 319
– lattice 114
– synthesis 140
Comedogenesis 97
Comedonal lipids 97
Con-A activation S47
Condylomata accuminata 220
Contact eczema S90
– photosensitivity 207
– urticaria 420
Corneocyte 293
– envelopes 424
Corticosteroid 282
C-type particles 264
Cutaneous permeability 375
Cyclic AMP 163
Cyclosporin A 89
Cytokeratin 19 257
Cytokines S33, 346
Cytomorphometric DNA measurements 187

DACM staining 308
Delayed-type hypersensitivity 18, 207
Dermal fibroblasts 185
Dermatitis herpetiformis 494
Dermatophytosis 45
Desquamation 97, 252
Detergent extraction 424
Dimethyl sulfoxide 380
Discoid lupus erythematodes 1
Dithranol 474
DNA diagnosis 457
– repair S19
Drug effects 114
Drug-induced allergy 124

Early psoriasis 189
Edema 375
EFA deficiency 286
Elastic fibers S68
Elastosis perforans serpiginosa 319
Electron spin resonance 29, 481
ELISA 45, 93
Enantiospecifity 5
Endothelial cells S61, 194, 235
Endothelium 338
Epidemiology of human papillomavirus infections S24
Epidermal cholesterol sulfate 97
– growth factor S42
– keratin 119, 469
– keratinization 129, 187
Epidermis 29, 61, S68, 83, 163, 454
Epidermolysis bullosa 333
– – acquisita 411
Epidermopoiesis 18, Epidermotropism 33
Erythema 300
Erythrocyte binding 12
– deformability 390
ETAF 33, 83
Etretinate 155
Experimental contact dermatitis 214
Extracellular matrix S42

Fat cells S68
Fatty acids 103
FcG receptors 395
Fcγ receptors 12
Fibroblasts S42, S68, 114
Fibronectin 228
Filaggrin S85
Fish pepsin 119
– trypsin 469
Flow cytometry 129
Foam cell 108
Follicular hyperkeratinization 97
Free radicals 137

Gamma interferon 235
Gene deletion 457
Glutathione peroxidase 171
Granulocytes 346
Granuloma annulare 325
GSH 371

Hair bulb epithelium 179
Hair cortex 308
– papilla cells 140
Heating 380
Hematoxylin stainable protein 462
Herpes virus infections 220
Heterogeneity 64
Histamine 158
– release inhibition 155
HLA class I antigens 131
– markers S47
HTLV-negative 264
Human epidermis 131, 497
– hair bulb papilla cells 185
– keratinocytes 176
– mast cells 155
– peripheral blood mononuclear cells 395
12-Hydroxy-eicosatetraenoic acid 474
15-Hydroxy-eicosatetraenoic acid (15-HETE) 430
Hypercholesterolemia 108
Hyperpapillomatous epidermis 64
Hyperproliferation 286
Hypervitaminosis A 246
Hysterectomy S29

Ichthyosis congenita 268
IgA 494
Immune reactions of skin-keratinocytes 12
Immune-related disorders S55
Immunofluorescence method 411
Immunogold labelling 131
Immunohistochemical localization 145
Immunohistochemistry 93
Immunopathology S61
Immunoperoxidase staining 363
Inositol triphosphate 286
Interleukin 1 83
Interleukin-2 S47
Irritation 375
Isotretinoin 97, 155
Isozymes 454

Keratin 50
Keratinization 451
Keratinocyte cultures 137
Keratinocytes 71, 103, 214, 228, 235, 323
Keratinolytic proteinase 45
Keratinosome abnormalities 268
Keratohyalin granules 462
Koebner phenomenon 189

Lamellar ichthyosis 268
Langerhans cells 33, 39, S61, 131, 214, 220, 327, 405, 451
Laser-Doppler flowmetry 420
Leu-11b 176
Leukotriene B_4 430, 474
Leukotrienes S33
Lichen planus 23, S55
Linear IgA disease 494
Lipid peroxides 171
5-Lipoxygenase 430
Liver 171
LTB_4 194
Lung cancer S15
Lupus erythematosus 327
Lymphocytes 1, 395, 494
Lymphocyte subsets 405
Lymphocytotoxic autoantibodies 399

α_2-Macroglobulin 93
Macrophage infiltration 18
Malignant melanomas S13
Mast cell isolation 358
Mast cells S68, 158, 189, 282, 363
Melanocytic nevus S13
Membrane fluidity 29, 481
– lining protein 462
Merkel cell granules 385
Metabolism S42
MHC class II antigens 179
β_2 Microglobulin 228
Microlymphocytotoxicity test 399
Mixed connective tissue disease 1
– skin lymphocyte reaction 83
Molluscum contagiosum 220
Monoclonal antibodies 64, 93, 405
Mouse 39
– epidermal cells 437
– skin 182
– vaginal epithelium 451
Mutagen sensitivity S19
Mutation frequency S19

Na^+, K^+-ATPase 29
Nail S85
Neoplasms S13
Neuropeptides 279
Neutrophils 430
Nevoid basal cell carcinoma syndrome S19
Nonimmunologic immediate contact reactions 420
Normal human skin 145
Nuclear differentiation 187
Nude mouse 23

OAG 182
Ontogeny 39
Oral contraceptives 388
Organ culture 23
Oxygen intermediates 163
– radicals 346

Pathogenesis S61
PBML 279
Pemphigoid 127
Pemphigus S66, 127
Penetration enhancers 67
Percoll 358
– density centrifugation 29
Percutaneous absorption 67
– penetration 57
PHA S47
Phenylbenzimidazole sulfonic acid S90
Phosphatidylinositol 4,5-bisphosphate 286
Phosphodiesterase 89
Phospholipase S33
Phospholipase A_2 481
Photohapten-modified cells 207
Phototoxicity S90
– testing 168
Pili annulati 308
Piloleiomyoma S29
Pityriasis lichenoides S61
– rosea 405
Pityrosporum orbiculare 168
Platelet-activating factor, AGEPC S33, 124
PMN 194
Polymorphonuclear leukocytes 477
Polyploidy 61
Porokeratosis 61
Port wine stain 338
Potassium dichromate 214
Progressive systemic sclerosis 399
Prostaglandins S33, 392
Protein kinase C 182, 454
– metabolism 308
Protooncogenes 8
Psoriasis 8, 12, S51, 77, 198, 259, 282, 254, 474, 477, 499
–, vulgaris 390, 497
Psoriatic epidermis 257
PUVA S51, 282

Rabbit 108
Radioimmunoassay 392
ras Gene product 259
Rat skin 392
Reconstituted skin 252
5α-Reductase 487
Retinoids 103, 246, 388
Retrovirus 264
Root sheath fibroblasts 185

Scanning electron microscopy 293
Scleroderma S15, 395
Sebaceous gland 487
Sebum 246
– excretion 54
– production 152
Serum proteinase inhibitory capacity 198
– retinol level 499
Sézary's syndrome 264
Skin 39, S42, 358, 416
– aging 71
– burn 171
– lesions 327
– microorganisms 168
– model 252
– structure 293
– surface lipids 54
– transport 252
– tryptase 363
– tumor promotion 371
Somatostatin S51
Sporothrix schenckii S94
Sporotrichosis S94
Squaric acid 57
– – dibutylester S47, 57
– – diethylester 57
Steroid sulfatase deficiency 457
Stratum corneum 252, 424, 462
– granulosum 129
Substance P 158, 279
Sulfide silver staining 214
Superoxide 346
– dismutase 163, 171

Tanning 300
T cells 264, 279
T-cell subsets 235
Tetrachlorosalicylanilide 207
T-helper lymphocytes 399
Thrombin 380
Tissue reaction S94
TLC and HPLC analyses 437
T lymphocytes 354
TPA 182, 371
Transepidermis water loss 67
Transglutaminase 380
Tuberculin skin test 83
Tumor promoter 443
Type V collagen 145

Ultrastructure S94, 308, 319, 338
Ultraviolet light 481
Uranaffin reaction 385
Urinary glycosaminoglycans 77
Uterine myoma S29
UVB S90, 163
UV erythema 420
UV-radiation 300

Vasculitis 325
Vitiligo 137

Warts 220
Western-blot technique 399
Western immunoblotting 411
Wound healing 114

Xanthoma 108
X-linked ichthyosis 457
